EAS Antenna

AMUF10

The AMUF10 is an entirely invisible EAS solution from Checkpoint Systems. Designed for retailers require a totally discreet EAS solution, without sacrificing performance.

The AMUF10 is Checkpoint's latest invisible EAS offering. This product features a unique shielded antenna design. This technology minimizes the impact of in floor noise sources that plagued traditional floor systems with outstanding detection performance. The AMUF10 is perfect for flagship stores. Installed during the store construction process,

Control Box

Underfloor Antenna(S)

Underfloor Antenna(L)

Underfloor Antenna(XL)

UNDER FLOOR SYSTEM

Invisible protection

EXCELLENT PERFORMANCE

Detection of tags* across wide entrances/exits up to 1.6m height

CUSTOMIZED ALARM

In most cases, external sounders, lights or pagers can be integrated with existing in-store systems

ECO TECHNOLOGY

To ensure the AMUF10 uses a minimal amount of electrical power to provide protection at low energy costs

* Detection heights represent typical results using Checkpoint tags. Performance may vary based on local environmental conditions in the installed store.
